

# MultiCash Classic HW and SW requirements

## Hardware

Minimum hardware requirements include an IBM compatible PC of the following configuration:

- Processor Intel Pentium IV or higher, or comparable processor of other supplier
- Minimum 128 MB RAM (depending on the operating system, 256 MB is optimal)
- Minimum 100 MB free space on hard or network disk
- 3.5"/1.44 MB diskette drive or SmartCard reader (SmartCard readers/cards are optional, will be provided by the bank)
- Colour monitor with a minimum resolution of 1024x768 pixels
- Keyboard and mouse
- Local/Network printer
- CD-ROM (for installation CD)

## For data communication:

Communication equipment and settings:

- **Internet connection**, with the following TCP/IP settings: open 2101 port and 194.203.201.20 TCP/IP address or
- analogue modem with accessible analogue telephone line or
- ISDN card/ modem supporting CAPI 2.0 or higher (recommended is FRITZ! made by AVM) with accessible ISDN line

## Remark:

- a) Communication equipment (modems) has to be approved/certified for operation in the Czech Republic.
- b) The Bank cannot guarantee the correct function of all types of communication equipment used for data communication of the System.

For SmartCard Reader: - available USB port (recommended) or serial port

## Software

For correct and smooth operation of the System, the following must be installed on the hard disk:

- Windows 98 SE or
- Windows NT SP6A or
- Windows 2000 SP4 or
- **Windows XP SP2**
- Adobe Acrobat Reader 4.0 or higher
- Internet Explorer 4.0 or higher

The network installation requires additionally the following:

- fix IP address on the workstation acting as database server of the System or on the server
- all users have to share the same network drive mapped with permissions read/write/delete.

## Anti-virus Software

The Client is obliged to install anti-virus software that shall check the presence of viruses at least once a day.

The Client is obliged to install and properly configure the above hardware and software (that is including configuration of TCP/IP, modem, OS, etc.).
